

LK16237 & LK16238 FOAM SPREADER

Technical Specification

Material	Mild Steel
Finish	Powder Coated Black
Maximum Pressure	14 Bar (200psi)

Outlet Cross Sectional Area
As per (BS5306-1 5.2) 2875mm²

Part Number	Description	Type	Connection BSPP
LK16237	Foam Spreader	Straight	2 1/2"
LK16238	Foam Spreader	Straight	3"

Landon Kingsway's 2 1/2" tapered foam outlet spreaders are an essential part of fixed fire fighting equipment. The fixed foam system consists of an inlet connection, fixed piping and a discharge assembly, this enables fire-fighters to introduce foam into a compartment housing oil-fired boiler rooms, oil storage tank chambers or transformer chambers.

A maximum of three spreaders are to be used with one inlet pipe. Landon Kingsway also provide foam inlet cabinets as per BS5041.
